SUMMARY

I'm a KAIST undergraduate in Computer Science and Business & Technology Management, interested in how people make sense of complex information, coordinate with others, and work with AI. I build interfaces to explore those interactions. When the thing answering you is a model, a wall of text isn't really an interface. At the KAIST AI Experience Lab I work on generative UI and human-agent interaction. Lately the same questions have pulled me toward organizations, where information, decisions, and work are spread across people, tools, and documents, and at the Collaborative Social Technologies Lab I've joined a project that puts a team of agents to work on those documents, with people in the loop, to surface the workflows already hidden inside them. Away from work, I trained cheerleaders as ELKA's head of training, and I read whenever there's a gap in the day.

EDUCATION

KAIST 2022 – 2028.02

Bachelor of Science in Computer Science, Expected February 2028

EXPERIENCE

KAIST CSTL (Collaborative Social Technologies Lab) 2026.08 – now

Undergraduate Research Intern

KAIST AEL (AI Experience Lab) 2026.06 – now

Undergraduate Research Intern

SPARCS 2026.02 – now

Buddy team, iOS developer

KAIST Open Source Impact 2026.05 – 2026.06

FrontEnd / Maintainer

Immersion Camp (MadCamp) 2026.01

four shipped products in four weeks

Republic of Korea Army 2024.01 – 2025.07

Assistant instructor, mandatory military service

ELKA (Encouraging Leaders of KAIST) 2022.03 – 2023.11

Head of Training, cheerleading squad

HONORS & AWARDS

Honorable Mention (4th place) for Bill:ION 2026

GDGoC DevFest 2026

Special Warrior (top-tier soldier certification) 2024

Republic of Korea Army

Outstanding Freshman Award 2022

KAIST
